A "Metaphorical" Theorem

Forest Kobayashi

Harvey Mudd College

February 11th, 2018

Today's talk

▶ Prompt: "focus your talk on a favorite mathematical idea or theorem."

Today's talk

- ▶ Prompt: "focus your talk on a favorite mathematical idea or theorem."

- ▶ Original presentation: interplay between visuals and algebra
  - ▶ Technical
  - ▶ Not what I *really* wanted to talk about

Today's talk

- Prompt: "focus your talk on a favorite mathematical idea or theorem."

- Original presentation: interplay between visuals and algebra
  - Technical
  - Not what I *really* wanted to talk about

- Prompt, redux: "A *personal* 'Aha!' moment in mathematics."

Today's talk

- Prompt: "focus your talk on a favorite mathematical idea or theorem."

- Original presentation: interplay between visuals and algebra
  - Technical
  - Not what I *really* wanted to talk about

- Prompt, redux: "A *personal* 'Aha!' moment in mathematics."
  - Yeah, I can do that.

Agenda:

Today, we'll talk about perseverance.

Agenda:

Today, we'll talk about perseverance.

Theorem
Hard work pays off.

Backstory

- ▶ Middle school

- ▶ High school

  - ▶ Math: by *far* my worst subject

  - ▶ Ms. Bender's Precalc class

  - ▶ 11$^{\text{th}}$ grade — almost kicked out of the honors program

The general case:

Theorem

Hard work pays off.

The general case:

Theorem

Hard work pays off.

Proof.

Left as an exercise. ☐
